1 Start

- The flow begins when a user accesses the system.

---

2 User Authentication (Login/Register)

- Users must either **log in** or **register** to access the platform.

- Authentication ensures that only authorized users can interact with the system.

---

3 User Dashboard/Homepage

- Once authenticated, users land on their **dashboard**.

- The dashboard allows them to:

  o View **posts** from organizations/councils.

  o Access **analytics** (if applicable).

  o See **notifications** for new posts, interactions, and appointments.

---

4 User Actions (Three Main Functionalities)

At this stage, users can engage in three different activities:

A. Post Management (For Organizations & Councils)

- Users with appropriate permissions (such as organizations and councils) can:

  o **Create** new posts.

  o **Edit** existing posts.

  o **Delete** posts.

  o **Schedule** posts for future publication.

B. Engagement (For All Users)

- Users can **interact** with posts through:

  o **Liking** posts.

  o **Commenting** on discussions.

  o **Sharing** posts with others.

C. Appointment System

- Users can request **appointments** with organizations/councils.

- Appointments can be:

  o **Requested**

  o **Approved**

o **Rejected** by the organization or OSWS.

5 Notifications System

- The platform sends notifications for:

    o **New posts** created by organizations/councils.

    o **User interactions** (likes, comments, shares).

    o **Appointment updates** (approval, rejection, reminders).

6 End

- The flow ends when the user logs out or completes their interactions.

Summary

This flowchart provides a **clear user experience**:

1. **Login/Register → Dashboard**

2. **Users interact with posts (like/comment/share) OR manage posts OR schedule appointments**

3. **Notifications keep users updated on activities**

4. **User session ends when interactions are complete**
